

# Hydroponics Ideas

Jason Bell

August 27, 2014

1. A system that replaces a toilet lid and uses water in the toilet tank to grow plants.
2. A system for just for kids
3. A floating system
4. A modular system
5. A commercial system turned consumer
6. A system for “plants as art.”
7. A system made of wood
8. A system which is controlled totally from the computer like a printer. Connected to wi-fi. You fill it with materials, tell it what to grow, and it does.
9. A hydroponics system which is also a garden bench
10. A system which can be placed in a tree
11. A system which can float in a pool.
12. A rooftop system
13. A system with a stone overlay, so it could blend in with a kitchen countertop or an outdoor stone wall
14. A very, very tall system, or a very, very wide system.
15. A vase + hydroponics system, so your flowers never die.
